SUMMARY

Indonesian Language and AI Evaluation professional with hands-on experience in Speech-to-Speech and conversational AI evaluation. Skilled in evaluating Indonesian language quality, conversational naturalness, fluency, tone, context, factuality, and multi-turn consistency. Experienced in identifying linguistic and model-response issues and providing structured, evidence-based feedback at turn- and timestamp-level. Strong analytical and technical background in AI evaluation, data annotation, and quality assurance, with experience achieving an average QA score of 3.13 against a 2.00 target across 72 ratings.

EXPERIENCE

AI Speech & Conversation Evaluator *February 2026 – August 2026* *Outlier AI*

Evaluated Indonesian Speech-to-Speech and conversational AI responses for linguistic quality, naturalness, fluency tone, context, factuality and multi-turn conversational consistency. Provide comparative model assessments supported by precise turn- and timestamp-level observations.

- Maintained an average QA score of 3.13 across 72 ratings, exceeding the 2.00 quality target and demonstrating consistent annotation and evaluation quality.

Secretary (Administration and Data System) *May 2025 – Present* *Koperasi Desa Merah Putih Karanggeneng*

Oversee digital documentation and administrative records to ensure data integrity and accessibility. Manage and maintain membership databases to streamline administrative reporting processes. Standardize structured system documentation to improve organizational operational efficiency.

- Streamlined administrative processes, boosting efficiency by 30%.

Automotive Instructor (Digital Learning Support) *January 2024 – December 2025* *LKP Jendela Otomotif*

Lead the development and management of digital learning modules for automotive training. Provided comprehensive technical support for system-based learning media and LMS platforms. Authored detailed user guides and instructional documentation for students and instructors.

- Enhanced learner engagement by 30% through interactive modules.

Web Analyst *July 2022 – September 2022* *Bimbel YEC*

Monitored and analyzed web-based learning platform performance to identify system bottlenecks. Processed and validated system data to enhance the effectiveness of digital learning content. Collaborated with technical teams to ensure platform stability and implement new system features.

- Enhanced user experience, leading to a 40% drop in bounce rates.

EDUCATION

Bachelor of Informatics Engineering *2016 – 2022*

Universitas Muhammadiyah Malang | GPA: 3.00 / 4.00

Vocational High School – Light Vehicle Engineering *2013 – 2016*

SMKN 1 Kalitengah, Lamongan
